

# The Trolley™ - Monitor Lift

The Trolley™ family of innovative flat panel monitor lifts offers a flexible, secure, and space-saving solution for any computer environment — from the classroom/training room to the corporate office.

Available in two series (H-Class & E-Class), The Trolley™ provides a no-hassle way of hiding the flat panel display when not in use and making it emerge from beneath the desktop when needed.

**The H-Class** version features a pull lever activator with access doors that can be manually closed to create a clean, uncluttered work surface area. It accommodates most 17" (432mm) widescreen or 19" (483mm) diagonal flat panel displays.

**The E-Class** unit provides push button activation and automatic, retractable access doors. This model accommodates most 20" (508mm) widescreen or 21" (533mm) diagonal flat panel displays.

Both Trolley™ models feature *Intelligent Motion Technology™*. This feature protects the unit from accidental damage or vandalism by constant monitoring of The Trolley's current operational status.

See reverse side for model comparison chart.

The Trolley™ E-Class

## Basic Operation

H-Class is shown below

- 1 With the pull of a lever (H-Class) or press of a button (E-Class),
- 2 The display emerges from its fully recessed compartment beneath the work surface with its cables neatly hidden.
- 3 Access doors provide a clean, uncluttered work space.
- 4 Lock provides additional security when not in use.
